Notes

1. The PJM system mix represents all resources used for electricity generation in the region. Alpha Gas & Electric, LLC purchases power from the PJM system mix and backs 100% of load with biomass-based renewable energy credits.
2. CO₂ is a "greenhouse gas" which may contribute to global climate change. SO₂ and NO_x released into the atmosphere react to form acid rain. Nitrogen Oxides also react to form ground level ozone, an unhealthy component of "smog."
